

NOTICE TO ECONOMIC OPERATORS

Starting October 1, 2025, ANAC has launched a census of economic operators to ensure proper data recording on its systems. To fulfill this obligation, operators must be registered on ANAC's systems and have access credentials, even if this data has already been communicated via the digital procurement platforms (PAD). It is therefore necessary to complete or update the economic operator profile, an action available after obtaining the credentials.

- **Mandatory registration:**

All economic operators communicated to ANAC via the PAD must be registered on the Authority's systems and have their own access credentials.

- **Complete Profiling:**

Both newly registered and existing users are required to complete or update their economic operator profile. This requires access to ANAC systems, which is available after obtaining login credentials.

The reference portal is: <https://portale-servizi.anticorruzione.it/user-provisioning>

- **Login credentials:**

The first step in updating is obtaining the login credentials needed to complete the profile.

Please note that without a profile on the ANAC website, the SZN will not be able to complete the procurement process for works, goods, and services to non-registered operators via the PAD, as the platform does not allow the creation of the relevant form for data transmission and CIG acquisition.

For any information, please contact the ANAC contact center: 06 62289571

This procedure is also required for foreign economic operators.

The ANAC contact center number for foreign economic operators is +39 / 06 62289571.
